Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	**Stage 1** **Access the Dashboard**	**Stage 2** **Explore & Analyze Insights**	**Stage 3** **Decide & Act**
Actions *What does the customer do?*	• Opens the published Tableau dashboard link • Views Dashboard 1 overview • Scans sales by vehicle category	• Compares manufacturers and battery types • Uses filters and hovers for details • Checks range, ratings and map (Dashboard 2)	• Notes top categories, brands and hubs • Shares insights with leadership or clients • Plans portfolio, entry and policy moves
Touchpoint *What part of the service do they interact with?*	• Tableau Public dashboard link • Dashboard 1 landing view • Sales by category chart	• Manufacturer leaderboard scatter • Battery treemap and heatmap • Production map and CSAT pie	• Screenshots and exports • Reports and presentations • Strategy and client meetings
Customer Thought *What is the customer thinking?*	• “Is the data easy to find and trust?” • “Which categories sell the most?” • “Can I see it all in one view?”	• “Which brands and batteries lead?” • “Where is production concentrated?” • “How satisfied are customers?”	• “Which segments should we back?” • “Do I have evidence for my case?” • “What is the next step?”
Customer Feeling *What is the customer feeling?*	Curious but slightly overwhelmed by the volume of raw data	Engaged and confident as patterns and comparisons emerge	Confident and satisfied with clear, evidence-backed insights

Process Ownership *Who is in the lead on this?*	Individual (dashboard developer) publishes and maintains the Tableau Public link	Individual (analyst) keeps visuals, filters and calculations accurate	Business users (Strategy Director, BI Manager, Researcher) own the decisions
Opportunities *How can we improve this stage?*	• Add a short intro or guide panel • Add KPI summary cards on top • Improve dashboard load speed	• Add country and battery filters • Add tooltips explaining each chart • Add trend-over-time views	• Add one-click export or download • Add written recommendations • Add charging infrastructure data
